EDUCATION

University of Illinois Chicago

Master of Science in Management Information Systems (GPA: 3.8/4.0)

Chicago, IL, USA

Aug 2023 – May 2025

- Coursework: Advanced DBMS, Data Warehousing, System Analysis & Design, Business Data Visualization, Data Mining

Maharashtra Institute of Technology

Bachelor of Technology in Computer Science Engineering (GPA: 3.8/4.0)

Pune, India

Aug 2020 – May 2023

- Coursework: DBMS, OOP using Java & C++, Artificial Intelligence, Software Modeling & Design, Computer Networks & Security

WORK EXPERIENCE

Community Dreams Foundation, Sebring, Florida | Data Analyst | Sept 2025 – Present

- Designed 8 Power BI dashboards with UX-centered layouts, DAX measures, and Power Query transformations for 5+ departments, reducing manual reporting time by 40% and improving KPI visibility for leadership.
- Optimized Snowflake SQL queries and stored procedures supporting 12+ operational reports, cutting average query runtime by 35% through indexing strategies and query restructuring to meet reporting SLAs.
- Gathered requirements from 10+ business partners, built Figma wireframe prototypes for 3 report designs, and conducted user testing sessions that reduced post-launch revision cycles by 50%.

Chiesta, Jersey City, New Jersey | Technical Consultant – Project Intern | Aug 2023 – Jul 2024 | [Link](#)

- Engineered a Python and LangChain NLP pipeline extracting 18 coverage fields from 120+ medical policy PDFs across 12 payer organizations using 4,000-character batch processing with retry logic.
- Deployed a Flask REST API and policy comparison dashboard with AWS S3 batch ingestion, cutting manual analyst review time by 60%.
- Scoped system requirements with stakeholders across 12 payer organizations, converting business objectives into technical specifications for the AI document analysis pipeline.
- Evaluated 4 database technologies on latency, scalability, and cost to select the optimal architecture for medical policy metadata storage.

HiFi Technology Solutions, Pune, India | Data Analyst | May 2021 – Jun 2023

- Developed Tableau and Power BI dashboards consolidating ERP data for Sales, Marketing, and Finance teams, reducing strategic decision cycles by 30% across 3 business units.
- Authored complex SQL queries, stored procedures, and performance-tuned reports across MySQL and PostgreSQL, cutting query response times by 20% for 15+ analysts.
- Documented 20+ report configurations, data dictionaries, and Snowflake SQL workflows, standardizing pipelines across 15+ reporting processes and raising data accuracy by 25%.

PROJECTS

Enterprise Analytics Platform | Python, Apache Spark, Airflow, Kafka, PostgreSQL, FastAPI | [Link](#)

2025

- Architected a 3-domain analytics warehouse on Apache Spark and Kafka, orchestrated by Airflow DAGs across E-Commerce, Supply Chain, and Financial pipelines with automated data-quality checks.
- Exposed demand forecasting (ARIMA) and Z-score anomaly detection through 9 FastAPI endpoints, enabling real-time KPI queries across all 3 business domains.

SENTINELLA – Real-Time Fraud Detection | Python, XGBoost, LightGBM, FAISS, Flask, AWS | [Link](#)

2026

- Trained an XGBoost + LightGBM + Random Forest ensemble on 50,000 transactions with 33 engineered features, achieving 0.947 AUC-ROC after SMOTE correction for 2% fraud-class imbalance.
- Operationalized SHAP and FAISS semantic search for natural-language fraud explanations, with Evidently drift monitoring and automated Power BI export across 96 daily Airflow pipeline runs.

Clinical Trial Cohort Matching System | Python, FastAPI, XGBoost, spaCy, PostgreSQL, Metabase | [Link](#)

2026

- Developed a patient-trial matching pipeline across 300 patients and 25 trials using ICD-10 rule evaluation, spaCy NLP, and XGBoost enrollment probability scoring on 14 features.
- Configured a Metabase analytics dashboard and async recruitment engine with ML probability threshold filtering, processing 7,500 patient-trial match pairs for clinical trial coordinators.

SKILLS

BI & Visualization: Power BI (DAX, Power Query, Data Modeling), Tableau, Figma (Wireframing & Prototyping), SSRS, Metabase, Data Visualization

Languages & Querying: Python, SQL (Complex Queries, Stored Procedures, Query Tuning), R

Databases: Snowflake, PostgreSQL, MySQL, SQL Server, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS), Azure, Docker, GitHub Actions

Data Engineering: ETL Pipelines, Apache Airflow, Apache Spark, Apache Kafka, Data Validation

Tools: Pandas, NumPy, scikit-learn, Git, Jira
